Forecast for Saturday 22 Jan 2022

Weather: Generally cloudy, especially across western areas, but some cloud breaks will occur, mainly across eastern areas. Under the cloudy conditions low cloud will shroud the tops. Staying largely dry except for the odd spot of light rain or drizzle. Feeling cold on the tops.

Chance of cloud free mountain/hill tops above 800m: 10% or less across western areas, but 60% across the east at first then decreasing 20% by the end of the day.

Visibility: Mainly very poor with areas of low cloud and fog above 600m, especially across western areas. Below the low cloud, and where cloud breaks occur, good or very good visibility.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Feeling cold on the tops, with temperatures below freezing on the summit of Snowdon.

Forecast for Sunday 23 Jan 2022

Weather: A frost in places overnight under any clear spells that develop. Through the day large cloud breaks may develop, covering much of Snowdonia, leading to sunny spells, although some patchy cloud is likely to persist.

Maximum wind: Southwest 15mph, gusts 20 to 25mph.

Chance of cloud free mountain/hill tops above 800m: 20% possibly increasing 70%.

Visibility: Often very poor on the tops with areas of cloud above 600m and hill fog overnight. Generally very good below the low cloud, and with the cloud breaks that may develop.

Temperature: **Valleys:** Zero to Plus 2 Celsius rising to 7 Celsius.
At 800m: zero Celsius.
Freezing level: 800m.
